Bold-Boundaries remained the same for these buildings.

***These are the maximum number of students within the boundary. Students often attend other schools outside their home school boundary.**

****The basis for the calculations was information from the Council for Educational Facility Planners International document titled Defining Capacities. CEFPI is the leading national organization concerning educational facilities. Suggestions have been adjusted to meet DMPS programming (number of classrooms multiplied by 24 students as the average class size for calculations and preschool is not considered in capacity).**
