“Flippin Tha Script” is a concept that is designed to challenge youth to write or, in some cases, re-write the life-script they feel has already been written for them. The purpose of the summit is to highlight and honor the legacy of Dr. Martin Luther King Jr. to middle and high school students. Students will have an opportunity to learn, experience, and develop positive habits that will affect their lives and future choices and help them “flip their own script” to realize their potential for a productive future.
